# Integrated Prismatic Skylight

## Integrated Prismatic Skylight

Due to quality concerns with the polycarbonate lenses installed in our Integrated Prismatic skylights, we are suspending manufacturing and sales of the integrated product until further notice. We are concerned about potential performance issues over time.

We will continue to supply the Curb Mount Prismatic Skylight which is designed for both new construction and retrofit applications on any American Buildings roof. Available in four standard sizes for quick delivery and custom sizes with slightly longer lead-times, the patented design uses a double-glazed acrylic over acrylic lens with the highest UV resistant materials to ensure maximum visible light transmission. Its performance provides better quality light, maximizing energy savings by greatly reducing electric lighting use. The unique Roof Curb has been specifically designed for application on ABC metal roof systems and can be installed from the top of the roof.

**Critical Dates:** Integrated Prismatic Skylights are discontinued effective immediately. Curb Mount Skylights are available. For more information contact your local Sales Representative or visit [www.americanbuildings.com](http://www.americanbuildings.com)

### **Our Commitment**

ABC is committed to ongoing product quality and we stand behind every product we offer. This change is part of our commitment to quality.

If you have specific questions regarding this bulletin or any other area of our business, please contact your District Sales Manager or Project Coordinator.
