

New Non-Handed Panels

As an ongoing effort to improve the erectability of our products, add value, and expand services; American Buildings Company is announcing the following changes to the Standing Seam II and Standing Seam 360 Roof Panel Systems:

Current Left / Right Handed Panels

New Non-Handed Panels

Effective June 29, 2015, all projects pending production, with Standing Seam II or Standing Seam 360 roof panels will be manufactured with non-handed notching. This notching design eliminates the need for handed panels and predetermined sheeting direction. No lefts, no rights, just panels.

Please be sure to refer to your project specific documents in the job drawings package for more detailed information.

Our Commitment

American Buildings Company is committed to ongoing improvements in all aspects of our business. This change is intended to enhance our product offerings and improve our costs and competitiveness in the market place. Your input and comments are always greatly appreciated. If you have specific questions regarding this bulletin or any other area of our business, please contact your District Sales Manager, Customer Service Representative, or our Product Development Department.
