

SEAM LOC Roof Panel Being Discontinued

SEAM LOC Roof Panel Being Discontinued

Over the years American Buildings has maintained a full roofing product line for industrial, commercial and architectural applications.

Due to changes in metal roof system product specifications, whether driven by building codes or market preference, sales of our SEAM LOC roofing product have continued to drop to the point where it does not make financial sense for ABC to further invest in production tooling or expensive third-party testing to support the product. Over time it has been our experience that the more popular LOC SEAM panel has replaced SEAM LOC in most applications.

As a result, we will be dropping SEAM LOC from the ABC roofing product line, effective immediately.

All other ABC roofing products listed below will remain fully supported.

- Long Span III
- LOC SEAM
- LOC SEAM 360
- Standing Seam II
- Standing Seam 360
- Standing Seam Insulated Roof Panel
