

ONBUILDING

Auto Dealerships

There's a way to meet all of your auto dealership building needs, without compromises on time and within budget. Need a showroom that presents your image with impact? A service area with high ceilings and convenient clear span working space? A metal building system by American Buildings Company (ABC) can give you both—and a lot more.

ABC's metal building systems are custom designed with the industry's most advanced computer technology to meet all of your needs. ABC's systems can be combined with traditional veneers of masonry, brick, stone or other materials to give you just the look you want.

ABC also offers expanded options in wall and roof panels. You can choose Silicone-Polyester COOL™ panels or panels coated with SmartKote® PVDF. Both feature durable finishes that resist fading, extend the life of the structure and lower your energy costs. SP-COOL™ panels feature a 25-year finish warranty and are available in 8 great color choices. ABC's SmartKote® color finishes are available in a range of colors and can be warranted for 35 years. ABC's metal standing seam roofs are offered with 20-year weathertightness replacement warranties that include both labor and materials.

As part of Nucor Corporation, the largest steel company in the United States, American Buildings Company is one of the most vertically integrated manufacturers. We deliver our systems to the jobsite with our own transportation fleet.

Because of our systems construction, ABC's buildings go up fast and can be quickly and economically expanded to accommodate your future growth as well.

We're represented locally throughout North America by a network of Authorized Builders and Roofers—each of them an experienced professional who can take full single-source responsibility for the success of every project.

For a beautiful and economical solution to your auto dealership building needs, American Buildings Company has the proven answer. For further information, call us or log onto www.americanbuildings.com.
