

ONBUILDING

Aviation

When it comes to experience—and success—in designing and building aircraft maintenance hangars, FBOs and other aviation facilities, American Buildings Company (ABC) is unsurpassed. We have the economical, high quality way to meet your needs for large clear span areas, high eave heights, mezzanine office and lounge areas—whatever you need in an aviation building.

For unusually large projects, we can design and engineer special systems that combine the strengths of conventional steel with the economies of building systems, providing clear-span space of 500 feet or better.

ABC's buildings offer superior weathertightness—which can be backed by a strong 20-year roof warranty. Buildings are available in two choices of paint finishes: ABC's proprietary SmartKote® finishes, available in a range of colors that can be warranted for 35 years; and ABC's Silicone-Polyester COOL™ panels, available in eight great colors and features a 25-year finish warranty.

As a leader in the industry, ABC is represented by a network of Authorized Builders. Each of them is a highly experienced Builder with a solid record of performance.

For specialized aviation buildings as well as for your other construction needs, there's a smarter way to build today... with metal building systems by American Buildings Company. To assure the success of your next project, you can call 888-307-4388 or log onto www.americanbuildngs.com.
