

ONBUILDING

Community Centers

Today's community centers pose a tough set of design and construction challenges. How do you build...facilities that accommodate multiple meeting, cultural and recreational uses under the same roof?...Facilities that are flexible enough to allow for cost-efficient future expansions, remodelings and interior reconfigurations?... And, often toughest of all, facilities that are truly economical, both initially and throughout their useful lives?

American Buildings Company's metal building systems can be the best answer to all of those challenges. American buildings start with advanced computer design techniques that address every requirement for your center, and that treat each building as a one-of-a-kind "special." You don't have to settle for compromises or cookie-cutter solutions.

ABC's building systems offer complete freedom of design, including the incorporation of traditional building materials such as masonry, brick, stone or glass.

ABC's building systems are available with proprietary color finishes that can be warranted for 35 years. American metal standing seam roofs can be protected with 20-year weathertightness replacement warranties that include both labor and materials.

As part of Nucor Corporation, the largest steel company in the United States, American Buildings Company is one of the most vertically integrated manufacturers. We deliver our systems to the jobsite with our own transportation fleet.

When it's time to expand, ABC's buildings' non-loadbearing walls make it fast, easy and economical. With ABC's approach, building additions can be visually color-matched to the original structure. Interior layout changes are a snap as well.

We're represented locally throughout North America by a network of top-quality Authorized Builders/Roofers. Each of them takes full single-source responsibility for success and building owner satisfaction.

There is a better, more flexible and more economical way to build today. Your ABC Builder has it. For further information, call us or log on to our website www.americanbuildings.com.
