

# ONBUILDING

## Offices

Office buildings usually have many goals to accomplish. Not only must they provide efficient work space, but they need to create a favorable impression of your business in the eyes of clients or customers, employees, suppliers and visitors.

The assured way to achieve every one of those objectives without compromise is with a metal building system from American Buildings Company (ABC). ABC's buildings are custom designed using the most advanced computer technology in the industry. Our factory fabricated components are easily erected, slashing on-site time and labor costs and giving you faster occupancy.

ABC also offers expanded options in wall and roof panels. You can choose Silicone-Polyester COOL™ panels or panels coated with SmartKote® PVDF. Both feature durable finishes that resist fading, extend the life of the structure and lower your energy costs. SP-COOL™ panels feature a 25-year finish warranty and are available in 8 great color choices. ABC's SmartKote® color finishes are available in a range of colors and can be warranted for 35 years. ABC's metal standing seam roofs are offered with 20-year weathertightness replacement warranties that include both labor and materials.

As one of the industry's leaders, ABC is represented by a network of Authorized Builders. Every one of them is a highly experienced, quality-oriented Builder who can assume single source responsibility for the success of every project. For better office buildings that meet all your goals and optimize return on investment, check out the ABC solution.
