

ONBUILDING

Recreational

Metal building systems by American Buildings Company (ABC) are the ideal way to build sports or recreational facilities. Custom-designed, clear-span systems meet all your needs for open playing and spectator spaces, along with locker, child-care, lounge, food service and other facilities.

ABC does so with top quality and at the most economical initial construction and life cycle costs—the total costs of ownership over the entire life of your facility.

Advanced computer design technology speeds project completion time. It provides fully predictable costs and affords complete flexibility of building layout and appearance.

The weathertightness of ABC's metal building systems can be backed by a solid, 20-year roof warranty. Buildings are available in two great choices of paint systems: SP-COOL™ panels, available in 8 colors with a 25-year finish warranty; and proprietary SmartKote® finishes, available in a range of colors that can be warranted for 35 years.

As one of the leaders in the industry, ABC is represented by a network of Authorized Builders. Each one is an experienced, highly skilled Builder who can take single source responsibility for the success of every project. Top quality ABC sports and recreation facilities keep their good looks year after year and maximize their owners return on investment.
