## Transportation

Today's explosive growth in the tonnage of goods moved by trucks is transforming transportation terminals into major construction opportunities. There's no better or more economical way to meet the need for high-quality, state-of-the-art transportation facilities than with American Buildings Company's (ABC) metal building systems.

ABC building systems provide full layout flexibility and clear-span capabilities to meet all the functional requirements of modern facilities. This includes maintenance and repair shops, fuel islands, restaurants, showers, laundry and lounge facilities, on-premise convenience stores, mail and package service drops, ATM machines, game rooms and more. ABC building systems ensure the attractive appearance that helps draw driver's business.

For truck terminals, ABC building systems can meet your functional storage and loading dock needs with the same level of excellence. ABC's systems maximize the use of every square foot of interior space, at lower total life cycle costs than other building types.

ABC building systems can be readily combined with traditional materials to meet any appearance requirement, and ABC technology dramatically shortens design, fabrication and on-site erection time for major cost savings and faster occupancy. ABC buildings are unsurpassed when it comes to weathertightness and can be backed by a 20-year roof warranty that is the best in the industry. American Buildings Company now offers expanded options in wall and roof panels. You can choose Silicone-Polyester COOL™ panels or panels coated with SmartKote® PVDF. Both feature durable finishes that resist fading, extend the life of the structure and lower your energy costs.

ABC's SP-COOL™ panels, offered in 8 great colors, feature a 25-year finish warranty. SmartKote® finishes, available in a range of colors, can be warranted for 35 years.

All ABC building systems are offered through a network of quality builders who can take singlesource responsibility for your project success throughout every North American market. For further information, log onto our website at [www.americanbuildings.com](http://www.americanbuildings.com).
